U.S. Energy Savings Corp. offering Green Energy Option to Buffalo Customers

Leading energy retailer now offering an environmentally friendly energy program

Buffalo, NY – U.S. Energy Savings Corp. (www.usesc.com), a leading energy retailer located in Buffalo, NY, is pleased to announce the launch of its Green Energy Option program for natural gas customers (GEO*gas*). The program provides customers the opportunity to pay a small premium in order to offset their household's natural gas related greenhouse gas emissions with sponsored carbon reductions.

Many scientists believe that global warming is due in large part to the recent significant increase in the level of greenhouse gases in the earth's atmosphere. U.S. Energy Savings Corp. customers who enroll with the fixed price natural gas program, in addition to receiving peace of mind from volatile energy supply prices, can now mitigate the negative environmental impacts of their energy consumption.

"The average American natural gas consuming household is responsible for approximately 5 metric tons of CO_2 emissions annually just from natural gas use for home heating. Now, our customers can do something to offset those unavoidable emissions," states Brennan Mulcahy, CEO of U.S. Energy Savings Corp.

Participating customers can choose to offset from 20% to 100% of their natural gas consumption through GEO*gas*. As part of this program, U.S. Energy Savings Corp. invests in initiatives that promote CO_2 reductions such as industrial emission reduction programs, methane capture and use, and soil carbon removal.

"GEO is a simple, convenient program designed to help all energy consumers reduce the size of our carbon footprint. If a customer chooses to participate 100%, he/she would effectively offset approximately 5 tons of greenhouse gas emissions – that's more than 11,000 lbs annually. If nine of his/her neighbors did the same, the end result is a net offset of more than 50 tons (over 110,000 lbs) of carbon dioxide annually!" comments Mr. Mulcahy.

About U.S. Energy Savings Corp.:
U.S. Energy Savings Corp. provides the sale of natural gas and electricity to residential, small to mid-size commercial and small industrial customers under long term, fixed price contracts. U.S. Energy Savings Corp. is a part of Energy Savings Group, a leading North American retailer serving natural gas customers in Illinois, Indiana, Manitoba, Quebec, and British Columbia, electricity customers in Texas and both gas and electricity customers in New York, Ontario, and Alberta.
